- Cubwarmer
- Accessory set for HPX3 milk systems
- Cool Control 2.5l
- Bean container extension
- Coffee grounds disposal/ drip drain set

## Areas of use
- Self-service areas
- Large offices
- Canteens
- Care facilities

Recommended maximum daily output 100 cups

The X10c sets new standards and brings variety and freshness to the professional environment. Quite literally, because its repertoire proudly includes 34 speciality coffees, eight of which are cold-extracted. In addition to the classic Hot Brews and the popular Cold Brews, the professional automatic coffee machine also offers a variety of americanos and lungos. With the One-Touch Lungo function, the professional also prepares the extended specialities at the touch of a button. The P.A.G.2+ grinder, user-friendliness and functionality of the X10c are impressive: the colour display and physical buttons make interacting with the automatic coffee machine intuitive and inviting. The X10c is the perfect size for use in offices and self-service areas with a daily requirement of 100 coffee preparations. The permanent water connection offers the convenience of a constant supply of fresh water. Thanks to the flexible connection solution, the X10c can be easily disconnected from the water connection, making it ideal for occasional stand-alone use. "Form follows function" is the maxim of the design concept. From the clear lines to the practical dual spout and the MDB interface – the professional fully automatic coffee machine is impressive in every respect.
